Spotted Lanternfly Update: August 30, 2022

Mary Concklin, Extension Educator Emeritus

Fruit Production & IPM

UConn IPM Program Coordinator

The Spotted Lanternfly is on the move in CT. In mid-August adults were confirmed in Norwich (New London County) and this week in 2 locations in New Milford (Litchfield County). These confirmed populations are in addition to the ones already known in Fairfield County (Greenwich, Stamford, New Canaan, Darian, Norwalk, Westport & Fairfield) and New Haven County (West Haven, Cheshire, Milford & Orange).

Keep an eye for the adults and nymphs. If you see them, take a picture, then kill them. Send your picture and address to ReportSLF@ct.gov Look on Tree of Heaven, a preferred host plant, as well as grapes, apple trees and stone fruit trees.
